About Us

Welcome to Pearl Electric and Solar

Where expert electricians meet top-quality components to deliver reliable, efficient, and long-lasting power solutions.

We specialise in comprehensive electrical services, including solar energy systems and electrical contracting for residential, commercial, retail, and industrial projects. Our bespoke solutions are designed to meet the unique needs of clients across the region.

Our Services

Comprehensive Electrical and Solar Solutions

We provide a wide range of professional electrical and renewable energy services for residential, commercial, retail, and industrial clients across South Africa.

Our core services include solar panel installations and complete solar power systems, full electrical installations and wiring, electrical maintenance and repairs, as well as garage automation and CCTV systems.

DO YOU HAVE A ELECTRICAL PERFORMANCE CERTIFICATE (EPC)?

EPCs Now Compulsory for Qualifying Buildings Since 7 December 2025! An Energy Performance Certificate (EPC) rates your building's energy efficiency on an A-G scale, showing annual energy use per square metre.

About Us

Take Control of Your Property with Prepaid Meters

A high-quality camera system is one of the most effective ways to secure your premises. We install advanced, high-definition CCTV camera networks that allow you to monitor your property around the clock.

This guide explains exactly why property owners and landlords are making the switch. We will explore how prepaid systems can save you time, protect your cash flow, and eliminate endless frustration.

Our Services

Insurance and Remedial Work

Dealing with property damage is already stressful, so Pearl Electric and Solar simplifies the process by working with major insurance companies across South Africa to handle and manage all post-claim electrical repairs.

We understand the importance of quality and compliance in the context of insurance claims. That is why we provide full certification for all work completed, giving both you and your insurer absolute confidence that the installations and repairs are safe, code-compliant, and built to last.

Residential Solar Transformations

We have helped hundreds of homeowners achieve energy independence. A recent project in Krugersdorp involved designing and installing an 8kW hybrid solar system with 10kWh of battery storage.

The client needed a solution to combat frequent power outages and rising electricity costs. Our team completed the installation in three days, and the client now enjoys uninterrupted power and a 75% reduction in their monthly grid consumption.
